STACK

Node.js, Express, TypeScript, Next.js, React.js, JavaScript (JS), MonoRepo, OpenAI, MongoDB, PostgreSQL, Prisma (ORM), AWS, Figma (UI/UX), GitHub Actions, Nginx, Docker

PROJECTS

Social Media Backend clone

individual contributor Oct 2023 - Oct 2023

1. Employed TypeScript, Prisma ORM with MongoDB, Node.js, and Express to develop a modern backend solution, enhancing the foundation for social media applications. **Engineered Robust Architecture:** Designed and implemented a scalable and reliable architecture, ensuring optimal performance and seamless data management for diverse user interactions.
2. **Developed Comprehensive APIs:** Created and maintained APIs for efficient communication between frontend and backend components, facilitating smooth user experiences and data exchange.
3. **Implemented Advanced Authentication:** Integrated NextAuth for secure passwordless authentication and OAuth, fortifying user authentication mechanisms and safeguarding user data.
4. **Ensured Scalability and Flexibility:** Engineered the backend with scalability and flexibility in mind, accommodating future growth and enabling easy integration of new features.
5. **Conducted Testing:** Implemented unit tests and integration tests, to validate reliability and functionality.

Eventlify

Intern Jan 2024 - Jan 2024

- **Description:** Built on Next.js 14, Eventlify is a comprehensive, full-stack platform designed for managing events worldwide. It serves as a centralized hub, showcasing a diverse range of events while providing seamless payment processing through Stripe. Users can effortlessly purchase event tickets, manage their own events, and engage with related activities.
- **Key Features:**
 - **Technology Stack:** Next.js 14, TypeScript, Node.js
 - **User Management:** Utilized Clerk for efficient user management
 - **Payment Processing:** Integrated Stripe for secure and streamlined payment transactions
 - **Event Connectivity:** Smartly connects related events and organizes user profiles for enhanced engagement
 - **Search and Filter System:** Implemented a dynamic search and filter system to help users discover events matching their preferences
 - **Validation and UI:** Leveraged Zod for validation, React Hook Form, and shadcn for seamless UI experience
- **Project Link:** [Eventlify](#)

EDUCATION

B.Tech Computer Science 8.0 CGPA

M.S. RAMAIAH UNIVERSITY OF APPLIED SCIENCES, BANGALORE Jul 2015 - Apr 2019

EXPERIENCE

Business Developer

Scaler Academy Pvt. LTD Mar 2022 - Apr 2023
